

NATURAL HEALTH SERVICES

The natural care offered by ENHCenter, LLC/World-Wide Naturopathic Health Service, might be considered by some, outside the current standard of care in the medical community. Such natural care is commonly referred to as complementary or alternative medicine (“CAM”), or functional, holistic or integrative care. Many of these modalities have been long practiced with great success in many countries and cultures even though they may not be considered a standard in the US. While synthetic and allopathic medicine is essential and highly effective in life support and treatment of acute or catastrophic conditions, there are alternatives that can provide the body additional support and accelerate the healing process.

Who We Are

We are a Christian practice. We practice health according to Ezekiel 47:12 – ...and the fruit thereof shall be for meat, and the leaf thereof for medicine (KJB).

We provide health services using natural modalities and remedies proven over thousands of years to support and enhance human lives.

We believe:

- In God-given right to seek out health according to one’s beliefs.
- In the miracle of life; we do not treat or cure, we provide the body with what we believe it needs naturally. If the body has the elements it needs to heal itself, it usually will.
- In educating and informing about health according to our beliefs, education and experience.
- In assisting, those whose health needs have been abandoned by others.
- In assisting anyone of any faith in their quest for health without being subjected to their values and beliefs.

If you agree with these principles and would like to discuss your health needs, we are at your service. Please send email to info@enhcenter.com to schedule consultation.

Autism Spectrum Naturopathic Recovery Program (World-Wide)

Dr. Kulisz's Autism Spectrum Naturopathic Recovery Program is a five-step program for children with vaccine injuries such as autism spectrum. The program is available world-wide and is consistent with our core beliefs:

We believe in the miracle of life; we do not treat or cure, we provide the body with what we believe it needs naturally. If the body has the elements it needs to heal itself, it usually will.

The program consists of five steps:

(1) Restoration of gastro-intestinal tract and its essential functions: digestive, alimentary, neurological, defecatory (elimination & detoxification), immune, and mood control. (2) Systemic detoxification. (3) Restoration of metabolic/physiological and neurological profiles. (4)* Development/restoration of cognitive/intellectual abilities: understanding and following instructions, functioning within the group of peers, development of speech patterns, articulation of thoughts, needs, desires; development, understanding, and use of abstract concepts: good/bad, large/small, old/new or young, light/dark; and numerical concepts 1, 2, 3, etc..., mathematical operations: addition, subtraction, multiplication, division, etc... (5)* Return to, or join group of peers, make decisions, understand and take responsibility.

Depending on the severity of the symptoms and the age of the child, the program may last from 18 months to about 4 years. The older the child, the more severe the symptoms, the longer the program. Usually the first signs of improvement are visible after the first 3 months in the program.

*Therapist required.

World-Wide Naturopathic Health Service is an American private organization established in 2008 in Tulsa, Oklahoma, under the name E.N.H. Center, LLC., by Drs. Andre A. Kulisz and Tommie R. Dahlmann to provide in-office and Internet health services locally in the United States and across national borders. The services are for those that cannot receive care in their own countries, or that prefer naturopathic modalities to allopathic modalities. It is similar in scope and reach to Médecins Sans Frontières – Doctors Without Borders. The services come in forms of evaluations, consultations, second opinions, and supplies of naturopathic formulations. World-Wide Naturopathic Health Service provides services with substantial discounts that make them affordable to the recipients in economically depressed regions of the world and remove the sting of handouts and welfare dependence, preserving recipients' dignity and self-respect.
